
License Brackets

License brackets include holes for mounting a license plate. Products vary in material, and can include a hole for a license lamp.

Betts License Brackets feature a single hole for the lamp body and the appropriate amount of mounting holes. These brackets are completely customizable to suit the customer's application and come in a variety of materials. Betts can custom make other painted steel, stainless steel or aluminum brackets to meet the customer's specification.

Contact Betts customer service for more information.

- Designed to meet all FMVSS 108 requirements (49CFR§571.108)
- Covered by Betts' 5-Year Limited Warranty
