Do what's best.

BETTS TRU-FIT™ LIGHTING KITS—LIGHTING *YOUR WAY*.™

While anybody can sell you a standard set of components for your trailers or trucks, Betts believes you deserve better. That's the "why" behind Betts TRU-FIT Lighting Kits—every kit spec'd exactly to your dimensions and requirements from a wide range of choices that put you in the driver's seat. Betts offers a complete line of lighting component choices available to create your own customizations.

Light Modules

Available in standard and custom sizes, in a variety of materials and coatings, these enclosures are engineered to be durable and provide an attractive finish.

SIZES:

Betts manufactures several styles of light modules and frames including substitutes for current OEM standards.

MATERIALS:

Carbon Steel (available in powder-coated colors of gray, white, and black)
Stainless Steel (available in a electro polish finish or matte finish)
Aluminum

Junction Boxes

Manufactured in the traditional round 7-pole type or in a 4 X 8 rectangular style with 18 poles that can be combined with brass circuit bridges for large volumes of wires.

Vehicle Lighting

Manufactured in incandescent, multi LED, and single LED. Lamps are available in either a 12 or 24 volt only, or a multi-voltage. Lamps are manufactured in a flange mount body or a grommet mount style.

TYPES:

Stop/Turn/Tail
Turn
Back-up
Clearance/Marker (front, center, and rear)
ID Bar Rear Center lights (3 lamps, available as individual grommet lights, connected, or in frames)

LENSES:

Red
Amber
Clear

SHAPES:

Round
Oval

Harness Systems

Available in the traditional Betts Plug & Seal harness and the new TRU-FIT harness system or a combination of both. Both systems can be customized for cable lengths, multiple light combinations, and with a pre-wired junction box option.

TYPES:

Standard Plug & Seal comes in 2, 4, and 6-conductor plugs (male and female)
TRU-FIT comes in a traditional Truck Tank or Trailer harness system and uses Betts EZ-FIT grommet lights.

Custom Kits

We can provide "the total package" for you—harness system, lighting, junction boxes, light modules—everything you need for a fully custom kit tailored to your specifications.

Take a closer look at the leader. Let a Betts Lighting expert answer your questions or provide you with a lighting consultation today.

- Customized components and complete kits—assembled to your requirements
- Plug & Seal 2 and 4-conductor plugs—for superior sealing
- Exact-length harnesses—no excess wire for quicker, more accurate installation
- Brackets and mounting hardware included—for hassle-free installation
- Proprietary, sealed junction boxes—for easy inspection and diagnosis
- Customized light assembly boxes—built to your specifications and a variety of material choices.
